

3 Essentials Lenses

Last Modified on 09/14/2015 2:22 pm PDT

Three Lenses Every Photographer Should Own

1. General Purpose

A 24-70 mm f/2.8 is a great all purpose lens. It's fairly fast, giving you greater control of the depth of field.

2. Macro Lens

A great macro lens is at least 50mm f/2.8. It beautifully captures close up details and can also be used as a portrait lens as well.

3. Telephoto

Typically a telephoto lens should be in the range of 70-200mm with at least a f/4. It gives you a great distance to work with and a shallow depth of field to ensure your subjects are in focus.
